The ASMP Standard Series of High Performance Pressure Transducers have been designed for the detection of fluid and air pressures in demanding motorsport and automotive applications; ideal for high precision data acquisition or control systems.

With a modular construction and programmable amplifier, this provides a fast delivery time for standard and custom configurations.

Pressure ranges are available between 2 to 200 Bar in either Absolute, Gauge or Sealed Gauge reference. The ASMP Series are race proven and can be found in many race formula around the world.

For OEM applications we have many options available to customise these transducers.

KA Sensors adopts a continuous development program which sometimes necessitates specification changes without notice.

**Applications**

- Coolant
- Brakes
- Water
- Boost
- Fuel
- Oil

**Features**

- Built-In Connector
- Compact Design
- 2 to 200 Bar Range
- Rugged Construction
- ±0.5% Accuracy
