

## ASUH SERIES 4-20mA HYBRID PRESSURE TRANSDUCER

The ASUH Series of High Performance Sub-Miniature Pressure Transducers have been designed for demanding high temperature installations in precision engineering. The new design utilises miniaturised hybrid components, allowing savings in both size and weight.

This transducer has enhanced performance at elevated temperature and is optimised for extreme installations such as on-engine or transmissions. With a modular construction and programmable amplifier, this provides a fast delivery time for standard and custom configurations.

Pressure ranges are available between 1 to 400 Bar in either Absolute or Sealed Gauge reference. Industry standard 2-wire electrical connections allow configuration with most common ECU's and data logging systems.
