NPT SERIES NPT1 FLUID TEMPERATURE SENSOR

The NPT1 Series of High Performance Temperature Sensors are designed to measure the temperatures of fluid in demanding motorsport and automotive testing applications.

The sensing element can be either a PT1000 or a NTC $3K\Omega$ Thermistor; calibration of each is well defined and can be installed into most common ECUs and data logging systems.

Construction in either brass or stainless steel with standard motorsports cable and sleeve will protect from the harsh environments around the vehicle.

The NPT1 Series are race proven in many formulae around the world and offer a reliable and robust solution for professional engineers.
